

the Greens have exercised the main control over this property?

A. I will say this, I did not know my great grandfather at all I did know my grandfather and that far back yes because my grandfather use to work on the property.

Q. And there has been no claims whatsoever by anyone made as to the title of the property?

A. Not to my knowledge.

Marlin S. Green

STATEMENT BY MR. GASTLEY:

All the people who could testify in this case, who could tell the Court the true picture are either deceased or unavailable for testimony as in the case of the Complainant, George W. Green who is now in the Frederick Memorial Hospital and is incoherent enough to be abos to testify. We have performed a diligent search and served 50 heirs of Zachariah T. Green and William E. Green and have received from each of then a Consent Answer. We have presented exhibits to the Court and more particularly Exhibit 4 being the 1928 assessment in which Mr. Charles C. Green, father of the Complainant, had obtained an 8 acre tracr of land which is marked "Zachariah T. Green not assessed" and further we have presented exhibit 3 showing a change of assessment in 1937 which was placed upon the old 1886 Deed, Zachariah T. Green and William E. Green which during that time it was felt by people that handing of a Deed from person to person was an actual conveyance and not realizing that a formal Deed had to be prepared. We have presented some hear say testimony which we would like the Court to consider as if it was evidence. We have requested the Court to pass an Order prayed for in our Bill, clearing the defects from the title to this property and declaring that the Complainant has a good, marketable, fee simple title to the property mentioned in the Bill of Complaint.
